Tip Diameter	0.370 in
Raw Length	40 in

Description

The new Acculite 75 represents the latest in sub ultra-lightweight technology. This is a full 10 grams lighter than the Acculite 85 and geared more toward those who have a smoother tempo to produce the greatest club head speed possible with a steel shaft. The Acculite 75 is the perfect alternative to graphite in terms of weight, yet produces the consistency long associated with steel shafts.
