DISTANCE COMBINED WITH
PIN-POINT ACCURACY

Shipping from Germany

## Description

The Juggernaut Max irons are designed for golfers seeking maximum distance combined with pin-point accuracy. The FlexFace technology incorporates a high-strength forged 17-4 stainless steel face with variable thickness to push the COR to the maximum limit. The thinner face improves the weight distribution for an ultra-low and deep center of gravity. This not only increases ball speed for greater distance but results in straighter shots. Developed with modern lofts to work with today’s lightweight and higher launching shafts and designed for a broad range of golfers looking for the ultimate performance.
