RST OnePutt Basic

Item number	RSTBasic
Category	TRAINING AIDS

RST OnePutt Basic – hochwertiges Golfzubehör von Tesi Golf.

Description

RST OnePutt Basic
Are you afraid of putting?

OnePuttBasic is the ideal training tool for short putts by providing feedback on the direction and speed of your putts.

OnePuttBasic is a stainless steel metal plate (space-saving during transport) that you can place on a golf ball.

Due to the slope, the repetition rate of short putts is very high. Balls played with the correct putting speed run back again. Putts played too fast run over the tool and give you additional feedback.

Another challenge is a small hole in the upper third of the tool. With the right dosage, the ball stays on the hole.

At the bottom of the tool are markings that show you how exactly your ball would have entered the hole in the middle or off-centre.

OnePuttBasic can also be ordered with professional putting mats from PrivateGreens, which are precisely designed for use.

The included bag protects the tool during transport, e.g. in the golf bag.

With the RST One products RST OnePutt, RST OnePuttEasy and RST OnePuttPlus, OnePuttBasic can be used even more optimally, as the hole width can also be reduced, which presents an additional challenge.

You improve your short, medium and long putts with all RST One putting tools/aids, through practice with high repetition and accuracy - more putt success!
