Sand Blaster Wedge (RH) 52° - Clubhead

Item number	I2772A-052
Brand	Hireko
Manufacturer part no.	I2772A-052
Category	Wedge

The new Sand Blaster is the ideal weapon from any trap. Dual sole technology acts like skis in the water, gliding across the sand or rough! Unique hollow 2 piece construction allows the sole width to be increased dramatically to make it the most forgiving sand wedge we have ever engineered in either soft or firm sand, and even chipping and pitching around the green. Designed with a negative offset or "face-forward" feature which will help those who may have a tendency to pick or sweep the ball and makes this club virtually shank-proof. Also features a very deep face and an ultra-wide, convex sole. Regain confidence in your short-game and lower your score with the Sand Blaster Wedge.

Conforms with USGA Rules. Please note: without configuration (like added shaft grips etc.) this is only the clubhead!

Specifications

Material	Stainless Steel
Hand	for right handed
Bias	Neutral
Club Type	Wedge
for Handicap	High, Middle

Description
