Description

The innovative CP2 Wrap® combines high-performance technology with a soft, tacky feel and offers comfort and control for outstanding performance. CP2 features Golf Pride's exclusive Control Core® technology, an inner core stabiliser specially designed to reduce torque. A larger lower-hand geometry that simulates four extra layers of tape in the lower hand encourages consistent grip pressure. With the CP2, control is in the palm of your hand.

You have to try this! Incredible. Introducing the softest grip Golf Pride has ever produced. The core of the grip for extra stability (Inner Core technology) combined with soft rubber with higher traction. Less taper for improved comfort (in the direction of non-tapered grips). Available in 2 versions: Pro and Wrap.
