| **Flex** | R-Regular, S-Stiff |
| **Tip Diameter** | 0.370 in |
| **Raw Length** | 41 in |
| **Parallel Tip** | 3.5 in |

## Description

### UST Mamiya Proforce v2 Hybrid Graphite Shaft

**THE LEGENDARY proforce in a new guise and with better PERFORMANCE.**

UST Mamiya engineers have created a new higher performance Proforce.

- proforce v2 hybrids are for golfers looking for a medium-high trajectory

proforce v2 hybrids use aerospace materials and an innovative design to produce a very stable and consistent golf shaft. The low torque ensures maximum control with today's hybrid heads and offers significantly improved lateral stability. As a result, more energy is delivered to the golf ball at impact and

the launch trajectory is more consistent from shot to shot.
